

SECURITY LABEL

Provides you with an instant visual evidence of tampering. Its self-voiding features provide an excellent deterrent to theft while sealing your asset. Any attempt of tampering will be made known instantaneously by the revealed hidden message once the label is peeled.

It is ideal for application where seals are periodically broken for inspections and reapplication of new seal on the same sealing spot. Zero release of adhesive and the hidden message ensure no undesirable residue is left on the applied surface.

Security label uses high quality adhesive which can be applied to almost all non fibrous surfaces including plastic, metal, coated paper and glass.
